

Guaranteed Primary Care for Every Vermonter!

Support H248 and S53! *These bills will make primary care a public good for every Vermonter independent of private insurance, employment or income.*

Every Vermonter needs primary care. Whether it is to treat the flu, for a checkup, or to stitch you up after an accident, the Primary Care Physician is where most Vermonters access their care for most of their medical problems.

- Accessible primary care has been shown in numerous studies to be the single best step to improving population health. It is our first and best line of defense.
- Providing publicly funded primary care would lower health care premiums for everyone. (Vermont law does not allow private insurance rates to include services they do not pay for).
- Universal Primary Care is very inexpensive! It is less than 6% of total health care costs.
- Access to Primary Care will reduce the need for expensive hospitalizations and emergency room visits by treating conditions earlier and preventing disease.

Saves Money, Saves Lives!

UNIVERSAL PRIMARY CARE! NO OUT OF POCKET COSTS!

Support H248 and S53.

**Primary care for all vermonters independent of
health insurance, employment, or income!**
